1978 Grant-in-Aid for Scientific Research (Grant-in-Aid for Overseas Scientific Survey) Reports of Research Project

1. Number of Project 304326
2. Title of Project
Phylogenetical and Evolutionary Studies of New World Monkeys
in South America
3. Head Investigator
Kyoto University, Primate Research Institute, Instructor, Tsuyoshi WATANABE
4. Cooperative Investigator
Japan Monkey Centre, Researcher, Kosei IZAWA
Doshisha University, Assistant Professor, Akisato NISHIMURA
Kyoto University, Primate Research Institute, Instructor, Takeshi SETOGUCHI
Dokkyo Medical School, Lecturer, Nobuo SHIGEHARA
5. Finance

1976	2,800,000 yen (Preliminary Survey)
1977	12,000,000 yen (Overseas Survey)
1978	2,200,000 yen (Summary)
6. Results
Results of research are referred to following papers in this volume.
7. References
 - (1) IZAWA, Kosei; Problems of Distribution of Goeldi's Monkey. (in Japanese), *Monkey*, Vol. 21-1, 2, 1977.

CONTENTS

Preface

IZAWA, KOSEI: A Study of Peculier Distribution Pattarn of <i>Callimico</i>	1
NISHIMUR, AKISATO: In Search of Woolly Spider Monkey	21
WATANABE, TSUYOSHI, T. SETOGUCHI, and N. SHIGEHARA: An Outline of paleontological investigation	39
SETOGUCHI, TAKESHI, N. SHIGEHARA, and T. WATANABE: Description of a new caviomorph rodent from Miocene of Colombia, South America	47
WATANABE, TSUYOSHI: Craniometrical Studies on <i>Alouatta seniculus</i> —from the view point of sex d fferences and age changes—	51

PREFACE

I am very pleased that Kyoto University Oversea Research Reports of New World Monkeys are published here. This report is the results of Kyoto University Oversea Research of New World Monkeys in Colombia, Peru, Bolivia and Brazil. The research project was commenced in 1976 and continued in 1977 as well. The research program itself was just a continuation and expansion of the researches of New World monkeys conducted by the Japan Monkey Centre, Japan.

All the members of the research projects are rather young, and they are active and really powerful. They continued to research in wet and moist, and sometimes, miserable tropical rain forests. They are always suffered by mosquitos and ticks and, etc. etc. etc.... But they could encountered troops of monkeys so many times that they could obtain a lot of basic data on ecology and morphology of many kinds of South American monkeys. Another research party visited to paleontological sites to collect fossil mammals of the Tertiary.

The financial support was generously given by the Ministry of Education, Science and Culture of the Japanese Government. I am very grateful to the Governments of Colombia, Peru, Bolivia and Brazil for their kind permission and helpful cooperation to complete our research project. It is my hope that our research program may contribute to the further and better understanding of the friendship between Japan and these countries.

Shiro Kondo
